Erin, that is correct we will pursue the General Permit in rifle. Thanks,
George

Just need confirmation that you would like to pursue the general permit for
the Rifle project.

Good morning Erin. This email is to confirm our conversation of yesterday
whereby Produced Water Solutions intends to pursue the two projects/permits
for discharges of treated water into the Colorado river near Rifle CO and
the Platte river near Ft. Lupton CO. Please let me know if you need further
information at this time. We look forward to working with CDPHE on these
projects. Regards George Kast, CEO- PWS
