

Regulations Governing the Discharge of
Produced Water

November 8, 1976

Chief, *REJ* Permits Administration and Compliance Branch

Chief, Planning Branch, Water Division, 106 Coordinator

Attached for review is a set of the proposed regulations governing the surface discharge of water associated with the production of oil and gas, which I received from the State of Wyoming and which requests an EPA statement at the public hearings. I would appreciate receiving your comments and/or suggestions by November 29th, 1976, regarding the substance of the proposed regulations.

Bob Burm will prepare and present a coordinated EPA statement for the public hearing. Please provide him your formal or informal comments as soon as possible.
