

Functional Claims

"I think you should be more explicit here in step two."

Citrix Claim 8 Part 1

- 8. A system for conducting distributed learning among a plurality of computer systems coupled to a network, the system comprising:
- a presenter computer system of the plurality of computer systems coupled to the network and comprising:
- a content selection control for defining at least one remote streaming data source and for selecting one of the remote streaming data sources for viewing; and
- a presenter streaming data viewer for displaying data produced by the selected remote streaming data source;
- an audience member computer system of the plurality of computer systems and coupled to the presenter computer system via the network, the audience member computer system comprising:
- an audience member streaming data viewer for displaying the data produced by the selected remote streaming data source; and

Citrix Claim 8 Part 2

- a distributed learning server remote from the presenter and audience member computer systems of the plurality of computer systems and coupled to the presenter computer system and the audience member computer system via the network and comprising:
- a streaming data module for providing the streaming data from the remote streaming data source selected with the content selection control to the presenter and audience member computer systems; and
- a distributed learning control module for receiving communications transmitted between the presenter and the audience member computer systems and for relaying the communications to an intended receiving computer system and for coordinating the operation of the streaming data module.

Citrix Structure

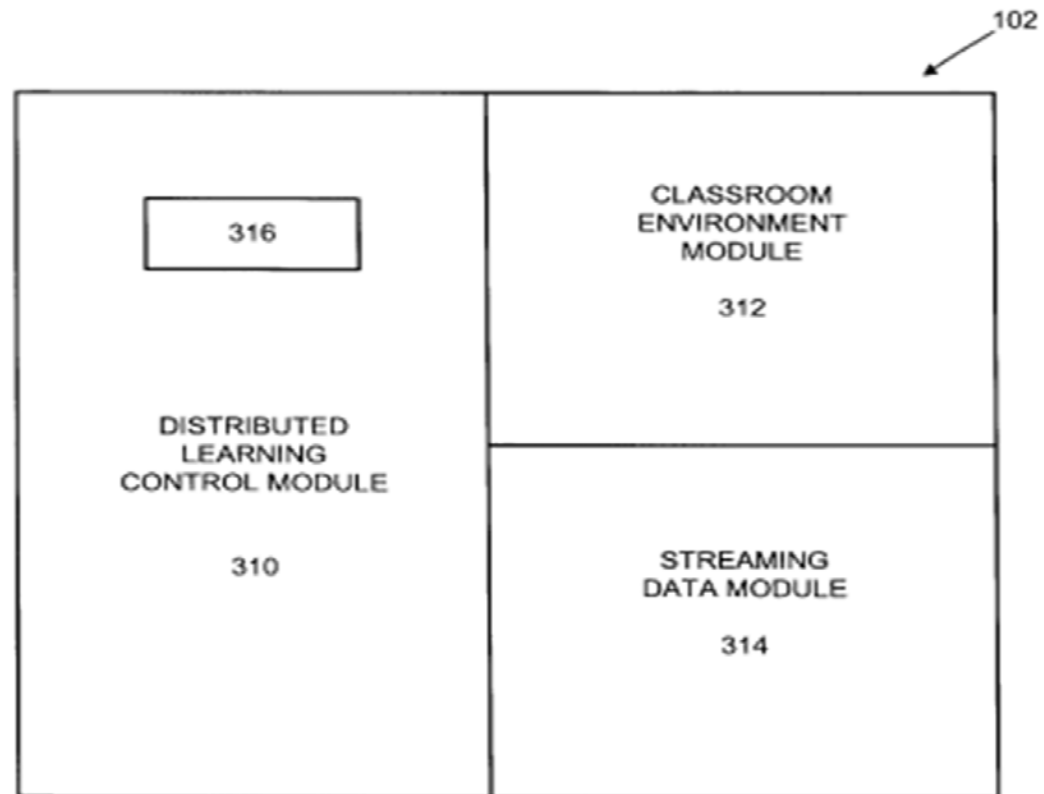

FIG.3

Citrix Claim 1 Part 1

A method of conducting distributed learning among a plurality of computer systems coupled to a network, the method comprising the steps of:

- providing instructions to a first computer system coupled to the network for:
- creating a graphical display representative of a classroom;
- creating a graphical display illustrating controls for selecting first and second data streams;
- creating a first window for displaying the first selected data stream; and
- creating a second window for displaying the second selected data stream, wherein the first and second windows are displayed simultaneously; and

Citrix Claim 1 Part 2

- providing instructions to a second computer system coupled to the network for:
- creating a graphical display representative of the classroom;
- creating a third window for displaying the first selected data stream; and
- creating a fourth window for displaying the second selected data stream, wherein the third and fourth windows are displayed simultaneously.
