# WELCOME

## FROM THE BCLT EXECUTIVE DIRECTOR

Established in 1995, the Berkeley Center for Law & Technology (BCLT) is the focal point at Berkeley Law for teaching, research, convening, and student activities on issues at the intersection of law and technology.

Our faculty directors work hard each year to ensure that the law and technology curriculum is broad, deep, and current. At the same time, your professors produce groundbreaking scholarship that is shaping the global debate on tech policy. After you get past your first semester, you might consider working for one of the faculty as a research assistant. Equally noteworthy are the alumni, practicing attorneys, policymakers, and scholars from other schools that we bring to Boalt to participate in our luncheon talks, conferences, and other events. Take time from coursework to expose yourself to these broader perspectives.

BCLT conducts a series of career events during the year, plus a summer reception for those staying in the Bay Area. Also, we support a wide range of student groups, which allow you to develop friendships and pursue interests extending beyond the classroom.

I urge you to take advantage of these and the other BCLT resources during the next three years. To learn about all our events and opportunities, sign up for our weekly eNews by giving us your email address on the sign-up sheets at any of our events, or email Claire Trias at [ctrias@law.berkeley.edu](mailto:ctrias@law.berkeley.edu). Claire is our Assistant Director for Program Development & Student Engagement.

If you have any questions, please contact Claire or me or our Associate Director, Jann Dudley. Our commitment is to provide you with a rich and diverse educational experience, to prepare you for life-long careers in technology law.

Jim Dempsey

Jim Dempsey is the Executive Director of the Berkeley Center for Law & Technology. A leading expert on privacy, Dempsey has experience as a judicial law clerk, a law firm attorney, a Capitol Hill staffer, a non-profit leader, and a Presidential appointee. Before joining BCLT, Jim spent 18 years with the Center for Democracy & Technology, serving as its executive director from 2003 to 2005 before moving to California to open CDT West. Dempsey led CDT's Global Internet Policy Initiative, which worked with government officials, industry, and human rights organizations on internet policy issues in developing and transitional countries, and he founded Digital Due Process, a diverse coalition working to update the Electronic Communications Privacy Act. From 2012 to January 2017, after confirmation by the U.S. Senate and appointment by the President, he served as a part-time member of the Privacy and Civil Liberties Oversight Board, an independent agency charged with advisory and oversight roles regarding the nation's counterterrorism programs.

# CURRICULUM

Berkeley Law offers a remarkably rich curriculum on technology issues: nearly 40 courses a year, ranging from the intellectual property survey class to the intensive learning experience provided by the Samuelson Law, Technology & Public Policy Clinic to advanced courses and seminars on patent prosecution, antitrust, privacy, cybercrime, telecoms, the law affecting the entertainment industry—even a course on wine law.

Annually, the faculty directors reassess the curriculum to ensure that it covers emerging topics that our students will encounter in practice. Recent additions to our course catalogue include:

## **Patent Litigation II**

While Patent Litigation I focuses on district courts, this course focuses on proceedings before the Patent Trial and Appeal Board.

## **Berkeley IP Lab**

Working under the supervision of leading practitioners, students perform a patent landscape survey for real startups, learning both substantive patent law and client counseling skills.

## **Cybersecurity in Context**

This course explores the legal, political, social, economic, and military factors that shape cybersecurity problems and their management.

## **IP and Social Justice**

This seminar explores the ramifications of intellectual property law for public health, freedom of expression, income inequality, group identity, and other social justice concerns.

There are also some exciting tech-related courses offered under our business law curriculum, such as Regulation of New Technologies - FinTech & Social Media and Blockchain, CryptoEconomics, and the Future Directions of Technology, Business, and Law.

## **LAW & TECHNOLOGY CERTIFICATE**

The Law & Technology Certificate recognizes a student's sustained commitment to technology law through successful completion of a prescribed number of tech-related courses plus participation in a student-led activity. The curricular requirements emphasize depth and breadth while affording students flexibility in adapting their course of study to a range of career paths. *Refer to p. 13 for complete certificate requirements.*
