

**Lauren Escher Lennon**  
**General Counsel, Scale AI**

**Lauren Escher Lennon** is the General Counsel at Scale AI. She previously served as the Head of Product and Privacy, leading the team counseling engineering and operations teams across legal issues, including automated decision making, copyright, open source, and customer industry-specific issues. She also led Scale AI's privacy program, advising company leadership on privacy issues and building out a risk-based privacy program focused on effective resource management to comply with global privacy regimes and customer requirements.

Prior to joining Scale AI, Lauren was Associate General Counsel at Instagram (Meta) serving on the product counseling team, where she led cross-legal efforts to align and standardize youth-related legal guidance and regulatory response and created actionable frameworks for product teams to address privacy and consumer protection requirements across a wide range of products, including machine learning model development. Lauren practiced litigation at Gibson, Dunn & Crutcher, where she worked on a variety of intellectual property trials and appeals, including the trial team that won the largest verdict in state court history.

Lauren earned her J.D., Order of the Coif, at Berkeley Law and served as the Managing Editor of BTLJ. She received her B.A., *summa cum laude*, in Political Science, Economics and History at Boston College and lives in Marin with her husband and two energetic young sons.
